Exam : 922-020

Title : MCS 5100 Ris.4.0 Installation and Commissioning

Vendors : Nortel

Version : DEMO

NO.1 A customer is deploying a new Multimedia Communication Server (MCS) 5100 RIs. 4.0 system. While

editing the installprops.txt file, what IP Address needs to be configured?

- A. the service logical IP address
- B. the floating service IP address
- C. the machine logical IP address
- D. the Dynamic Host Configuration Protocol (DHCP) server IP address

Answer: C

NO.2 A support engineer is preparing to install a Multimedia Communication Server (MCS) 5100 RIs. 4.0

system. The MCS 5100 servers have all been physically installed and cabled to the In-Reach Terminal

Server. Which information should you configure on the In-Reach Terminal Server to allow access to the

MCS 5100 servers through it?

- A. Define the IP address for each MCS 5100 server.
- B. Define the IP address for the Management Console PC.
- C. Define the port speed for each MCS 5100 server connection.
- D. Define the IP Address port number to which the MCS 5100 server is connected.

Answer: C

NO.3 Where is the Unified Network IP Stimulus (UNISim) protocol used in a Multimedia Communication

Server (MCS) 5100 RIs. 4.0 network?

- A. on ISDN PRI connections to the PSTN
- B. between IP Phones and the IP Client Manager (IPCM)
- C. between the Provisioning Client and an external SIP Gateway
- D. between the System Management Console and the Session Manager

Answer: B

NO.4 The technician is viewing a command typed from a PuTTY terminal that verifies the IP addressing for

the System/Accounting Manager. If the interface eth0 is not UP (it is unavailable), to which interface

would the machine logically attach itself?

- A. lo0
- B. eth1

- C. dmfe0
 - D. dmfe0:2
- Answer: B

NO.5 What is the purpose of the RTP protocol in a Multimedia Communication Server (MCS) 5100 RIs. 4.0 network?

- A. to transport real-time media streams across a packet network
 - B. to provide a means of sharing session data between endpoints
 - C. to provide a service-enabling protocol for real-time multimedia sessions
 - D. to control signaling between the Session Manager and the RTP Media Portal
- Answer:A
