**Exam** : **P\_BPTA\_2408**

**Title** : SAP Certified Professional -  
Solution Architect - SAP BTP

**Vendor** : SAP

**Version** : DEMO

**NO.1** A customer's sales department is having problems with governmental authorities dealing with transparency around logging events related to security and other compliance topics.

As an SAP Solution Architect, which SAP BTP service would you recommend for being compliant with regulations?

- A. SAP Cloud Logging service
- B. SAP Application Logging service for SAP BTP
- C. SAP Audit Log service
- D. SAP Cloud Management service for SAP BTP

**Answer:** C

**NO.2** You are a solution architect helping to design a custom-built application for business users. You must follow these use case parameters:

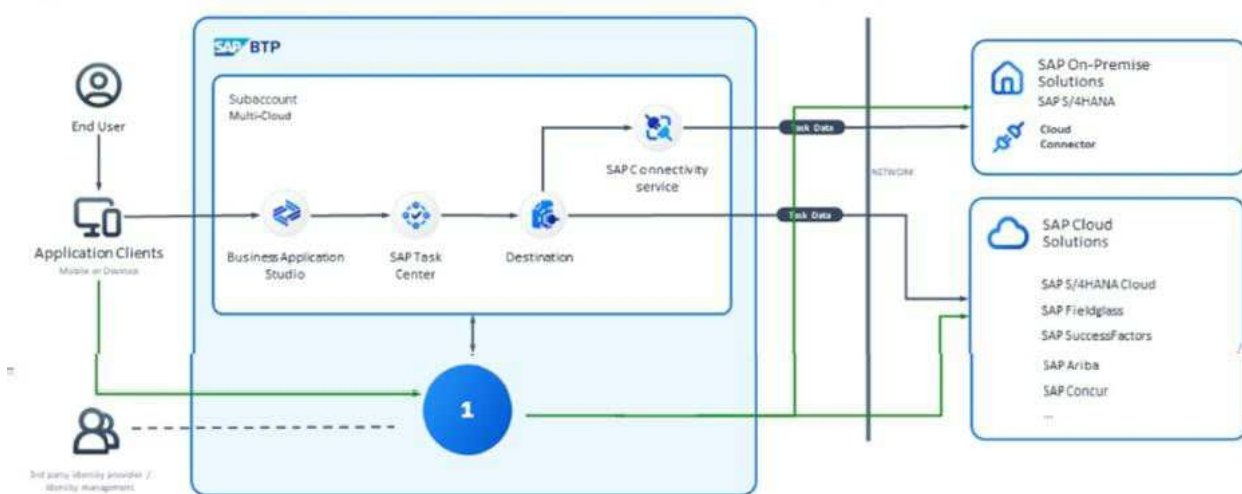

- \* The application requires data solely from SAP S/4HANA Cloud public edition.
  - \* The application supports create, read, update, and delete (CRUD) operations.
  - \* If multiple backend protocols are applicable the one with the fastest performance is to be used.
- Which of the following combinations would you recommend for the application design?

- A. SOAP Web Services
- B. OData Protocol (via SAP Fiori or SAP Cloud SDK)
- C. SAP Graph API
- D. REST API (custom or via SAP Business Technology Platform)

**Answer:** B

**NO.3** You are a solution architect and your client has recently completed a merger and acquisition. Your client uses SAP S/4HANA Cloud Public Edition and the acquired company is using SAP ECC 6.0. For business and legal reasons, the users of the acquired company cannot yet be added to the global user directory. The acquired users still need access to the custom application.

Given the attached diagram, which solution would you recommend to your client in "1" to enable this access?

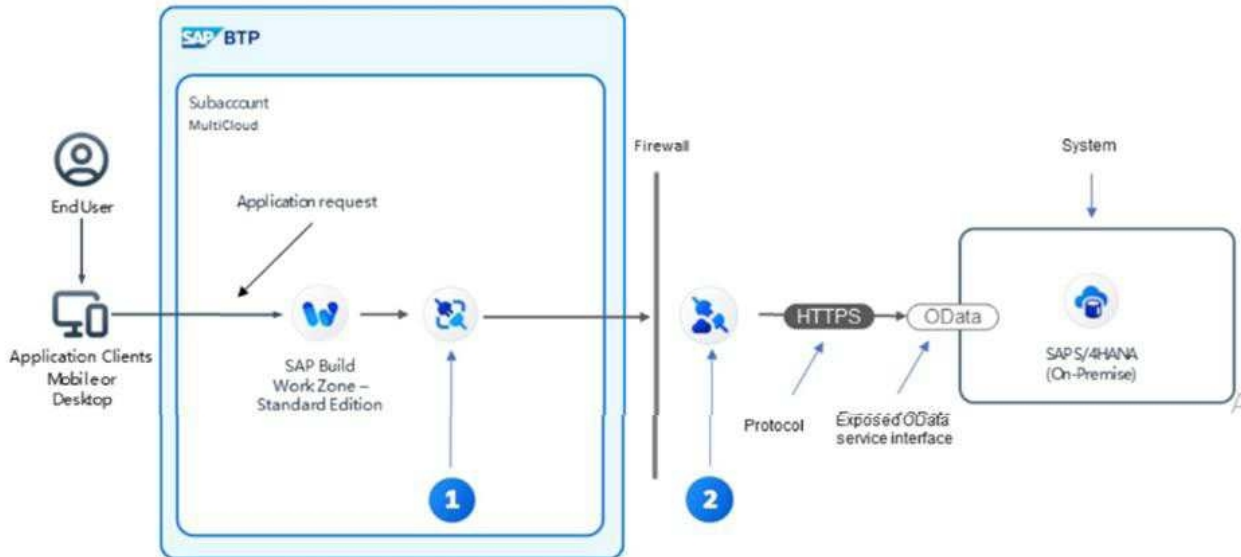

- A. SAP Secure Login Service for SAP GUI
- B. SAP Authorization and Trust Management Service
- C. SAP Cloud Identity Services - Identity Provisioning
- D. SAP Cloud Identity Services - Identity Authentication

**Answer: D**

**NO.4** A customer wants to establish connectivity between applications being executed by end users and the on-premise backend system (SAP S/4HANA).

Based on the attached diagram, which combination is necessary to establish the connectivity?

- A. Destination Service for 1 and Connectivity Service for 2
- B. Connectivity Service for 1 and Cloud Connector for 2
- C. Cloud Connector for 1 and Destination Service for 2
- D. Custom Connector for 1 and Connectivity Service for 2

**Answer: B**
